Portfolio: [Swastik Bhat M S](#) | [DevOps Portfolio](#) | **Location:** Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

DevOps Engineer | CI/CD & Automation Specialist. Post-graduate with an MCA degree and hands-on experience managing Linux-based AWS EC2 infrastructures, CI/CD automation, and secure database deployments. Proficient in automating vulnerability scanning pipelines and orchestrating legacy and modern Java application deployments using Jenkins and GitLab. Adept at bridging development and operations to ensure high availability and robust security postures.

SKILLS

- **DevOps & CI/CD:** Jenkins, GitLab CI, GitHub Actions, GHCR, Docker, Kubernetes, Ansible.
- **Cloud & Infrastructure:** AWS EC2, Linux (Ubuntu), VM Management.
- **Databases & Deployments:** Liquibase, Flyway, MSSQL, Oracle DB, Firebase Realtime Database.
- **Security & Monitoring:** FOSSA vulnerability scanning, Log Monitoring, Vulnerability Assessments.
- **Languages & Build Tools:** Python, Bash Scripting, Java (8 & 21), Maven, SQL, C++, Dart.
- **Version Control:** Git, GitLab, SVN.

EXPERIENCE

DevOps Intern | ICRA Fintellix, Bengaluru | Nov 2025 - Present

- Managed environment configurations and application deployments across a robust infrastructure of 50 local development servers and 2 production servers.
- Administered 2 dedicated Jenkins servers and GitLab infrastructure, managing upstream/downstream jobs, user access control, and legacy-to-modern Java (1.8 to 21) build processes.
- Engineered a zero-touch Jenkins CI/CD pipeline integrating FOSSA with Maven builds, completely automating the manual vulnerability scanning process and reducing execution time to just 3-5 minutes.
- Automated the packaging of cumulative database deployments using Liquibase and Flyway, consolidating multiple database packages into a single release and saving hours of manual engineering work.
- Replaced Salt with Ansible to orchestrate clean deployment pipelines within Jenkins CD, cutting down overall deployment time by 5 minutes and enhancing log response visibility for faster troubleshooting.

Application Development Intern | Avisia Tech Services, Bengaluru | Jul 2025 - Oct 2025

- Implemented and managed backend services, ensuring reliable data flow between a cross-platform Flutter application and the Firebase Realtime Database.
- Accelerated feature turnaround time for Flutter and Dart components by optimizing backend service integrations.

Cyber Security Internship | Supraja Technologies | Dec 2024 - Jan 2025

- Performed vulnerability assessments to identify and document 6+ critical security risks, including SQL injection and XSS vulnerabilities.
- Executed system enumeration and access maintenance to contribute to a stronger organizational security posture.
- Secured 1st place in the Ultimate Cyber Challenge Hackathon.

PROJECTS

Log Monitor DevOps Pipeline | Apr 2025 - May 2025

- Engineered a complete CI/CD pipeline with Jenkins and GitHub Actions, reducing manual deployment time from approximately 10 minutes to 1 minute.
- Managed container lifecycles by versioning images in GitHub Container Registry (GHCR) to ensure deployment consistency across all environments.

Personal Health Care Android App | Jan 2023 - May 2023

- Engineered backend services for a healthcare application, managing user authentication and a real-time database using Firebase.
- Ensured high availability for real-time data synchronization and implemented push notification functionality.
- Awarded 1st Place at the OPERA-2024 Project Open House.

EDUCATION

Master of Computer Applications | RNS Institute of Technology, Bengaluru | Dec 2023 - July 2025 | CGPA: 9.17

Bachelor of Computer Applications | LBAS and SBSC College, Sagara | Oct 2020 - Sep 2023 | Percentage: 82.4

CERTIFICATIONS

- Introduction to DevOps (IBM)
- Automation in the AWS Cloud (AWS)
- AWS Cloud Technical Essentials (AWS)
- Introduction to Information Technology and AWS Cloud (AWS)
- Introduction to Agile Development and Scrum (IBM)
